9h00

General introduction Valorisation & IP

What should I do with my results? Who are my interlocutors? What are the tools to protect my results? The objective of this training is to present the ecosystem of valorization and to address the possible ways of valorization (licensing, business creation, partnership and participatory research...). *Marion Allier (CNRS-France)*

10h30

Valorization of technical inventions: patent protection

What is a patent? Is it possible to protect my search results with a patent? Is the patent compatible with publications? The objective of this training is to answer all these questions and to take stock of the patentability criteria, best practices... *Sophie Brenet (Hautier IP-France)*

11h30

Digital Protection

How can I protect my results as code? What are the filing procedures? The objective of this training is to learn how to protect the digital and to take stock of software protection tools. *Sophie Brenet (Hautier IP-France)*

12h30

Lunch Break (1h)

13h30

Open science

What is open science? What are the best practices for publishing and promoting my thesis, including internationally? How can we use open access? The objective of this course is to provide an overview of good practices in open science. *Caroline Bertoneche et Lucie Albaret (University Grenoble Alpes - France)*

14h30

Protection and valorization of know-how

What is know-how? How do we protect it? What is the difference between know-how and personal expertise? What is the difference compared to a patent? The aim of the training is to take stock of all these issues and to detail best practices related to the valorization of know-how. *Jérôme Sartorius (CNCPI - France)*

15h30

What if my PhD could help me become an entrepreneur?

Join us for a fun session and learn how to turn your research results into entrepreneurial opportunities. We'll talk about: most common opportunities and barriers for young researchers, case studies and real life example solutions and organisations to help you go from your idea to an actual project, . *Anthony Leonard (SATT Linksiur - France), Marion Majou (University Grenoble Alpes - France), Pépite Ozer - France)*

Thursday 18/01/2024
